

Environmental Protection Policy

Environmental Protection starts at the top, with the Board. The Board will make sure everyone has the support, training and resources they need to implement this policy.

OUR VISION

Our goal is to minimise the environmental impact of our operations by preventing pollution and adopting sustainable policies.

OUR ACTIONS

We will measure our environmental impact and set targets for improvement

We will take precautions during tasks, measure our waste, our use of energy and natural resources, our carbon emissions and all other areas which affect our protection of the environment. Wherever possible we will target and support improvements.

If incidents happen which have an environmental impact, we will record, report and investigate fully, making sure we learn lessons and improve for the future.

We will report our performance.

Environmental protection will be a constant factor in our business operations

Staff and managers will always consider environmental factors when making business decisions.

We will train and support our staff to give them the awareness and knowledge they need about environmental protection.

We will meet, and where possible, exceed applicable legal requirements, regulations and standards.

We will work with others to reduce our environmental impact

We will work with local communities and be a responsible neighbour.

We will play an active role in making sure that our sector adopts environmentally sound policies and practices.

We will encourage contractors, suppliers and customers to reduce their environmental impact.
